SUMMARY

I am a third year informatics student who oriented on issues as a new challenge, also have a grit that continuously develops, and ready for a new challenge. Looking further at every challenge as an opportunity to explore myself, I also always stick to honesty as the foundation of everything. Because I believe that honesty and trust are very valuable. Have experience in website development, machine learning, and interest in data science. I have good skills and experience in making projects individually also in groups.

EDUCATION

UNIVERSITY OF PEMBANGUNAN NASIONAL VETERAN EAST JAVA (July 2021 – Present)

Bachelor of Informatics Computer Science Faculty

- GPA: 3.9/4.00

UNIVERSITY OF PUTRA INDONESIA YPTK PADANG (October 2020 – June 2021)

Bachelor of Informatics Computer Science Faculty

- GPA: 3.6/4.00

SENIOR HIGH SCHOOL 75, NORTH JAKARTA (July 2017 – June 2020)

Graduated in Natural Sciences.

PROJECTS

REHES (RENTAL HEALTH STUFF) (February – June 2023)

UI/UX Designer

- ReHes is a mobile-based application for rental of health stuff, this application will work with hospitals or clinics to facilitate rental. This application has just been realized in the form of a prototype.
- I worked on this project individually to create an application interface starting from the splash page to completion along with the prototype.
- Tools : Figma

BEKASTORE (February – June 2023)

Back-end Developer

- BekaStore is a website e-commerce that can be used to sell preloved stuff, give away items for free as grant, and room rental.
- I worked as a group in this project, I happened to get a part in the back-end but also helped the front-end in some things such as working on certain pages.
- Tools : MySQL, PHP, JavaScript, Bootstrap

NOTIFY (May – June 2023)

Front-end Developer

- Notify is a website-based application for record tasks or create to do lists and reminders.
- I worked as a group in this project and got the responsibility to work on the front-end for this time I just focused on my part and completed the page according to the plan.
- Tools : HTML, CSS, Bootstrap

LIBRARY (May – June 2023)

Front-end Developer

- Library is a desktop-based application that can be used for recorded borrowed and returned books at the library and can display them in the form of history and record members.
- I worked in a group in this project and got the responsibility to work on the front-end for this time I just focused on my part and completed the page according to the plan.
- Tools : Java, MySQL

SOILINK (Nov 2023 – Present)

Machine Learning

- Soilink is an android-based application that functions to detect soil types and provide related information. The application will process the images received from the camera or manually uploaded from the gallery.
- I worked as a group on this project as a graduation requirement in Bangkit Academy and got the responsibility to build models for applications with the main goals of high accuracy and not overfitting.
- Tools : Python

EXPERIENCES

MACHINE LEARNING STUDENT

(Aug 2023 – Present)

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka

- Learn about data analytics, mathematics for machine learning and data science, machine learning specialization, deeplearning, and model deployment with tensorflow
- Bangkit also provide us with soft skill and English class because using English is mandatory in Bangkit

IT INTERN BBWS BRANTAS

(Aug 2023 – Nov 2023)

Kementerian Pekerjaan Umum dan Perumahan Rakyat (PUPR)

- Regenerate website for employee recruitment and responsible as front-end in this individual project

HEAD OF COMMUNITY SERVICE

(May 2023 – Present)
